Klyara Financial Model

A live workbook. Change the blue cells. Everything else works itself out.

What this is

Klyara is the back office for small construction firms. Bookkeeping, CIS, VAT and payroll,
in Guildford and the towns around it. Solo £59, Start £99, Trade £199, Pro £329 a month, plus VAT.

Klyara has no clients yet and is not yet AML supervised. Every number in this workbook is a MODEL
built on stated assumptions and real published market prices. None of it is a result, and none of it
is a promise. The first month any client can be onboarded is October 2026, because the ICB practice
licence application goes in on Tuesday 1 September 2026 and takes about 28 days.

The colour code

Blue on cream	an input — change these
Black	a formula — leave alone
Green	a link to another sheet

Blue on cream cells are yours. Black cells are formulas. Green cells pull from another sheet.
If you type over a black or green cell you break the chain, and the sheet will quietly go wrong.

What to change first

CELL	WHAT IT IS	WHY IT MATTERS
Assumptions C21	Booked calls a mon	Everything downstream moves off this one number.
Assumptions C24	Proposals won	35% is the docs/09 target. Below 25%, fix the diagnosis, not the price.
Assumptions C25	Monthly churn	2% a month is about 22% a year. It is an assumption, not data.
Assumptions C41	Capacity per perso	25 clients. The Build Manual says 20–25.
Cash flow C10	Opening cash balar	Whatever is actually in the account on 1 September 2026.

What is on each sheet

SHEET	WHAT IT DOES
Assumptions	Every lever in the business, on one page.
Startup costs	What it takes to get trading. Estimates are marked as estimates in the cell comments.
P&L forecast	36 months. Monthly for year one, quarterly for years two and three.
Cash flow forecast	The same periods, with VAT and tax set aside properly, and the cash low point.
Break-even	How many clients cover the fixed costs, at both price levels and with an employee.
Pricing and margin	Hours to serve each tier, the effective hourly rate, and the market comparator.
Dashboard	The six numbers that matter. Nothing on it is typed.
Scenarios	Slow, plan and fast, driven by one input cell.

Things to know before you trust a number

Years two and three are modelled a quarter at a time, not a month at a time. Revenue in a quarter
uses the average of the opening and closing client count, which is the standard way to do it.
New clients are capped by capacity. If the funnel would deliver more clients than the team can serve,
the surplus shows up on the Waitlist row rather than in the revenue. That is deliberate.
Neither founder draws a salary anywhere in this model. Add one on Assumptions if you want to see it.
Every conversion rate here is an assumption. Replace them with measured numbers after six real calls.

Built against docs/21 (pricing and scope), docs/22 (the market benchmark, checked 26 August 2026),
docs/17 (verified compliance facts) and docs/20 (the risk register).

Assumptions

Every lever in the business. Change the blue cells and nothing else.

PRICES — the founding rate, per month, excluding VAT

Solo	£59	Sole-trader subcontractor. CIS suffered, not deducted.
Start	£99	VAT registered, still working alone or with one hand.
Trade	£199	Pays subcontractors. Monthly CIS returns included. The core client.
Pro	£329	Established firm, job costing, up to 15 employees.
Average onboarding fee	£300	One-off, weighted across tiers. See the cell comment - this one is arguable.

MIX — what proportion of new clients lands on each tier

% Solo	35.0%	Highest volume, lowest value.
% Start	25.0%	
% Trade	30.0%	Where the money is. docs/21 wants 60% on Trade or Pro.
% Pro	10.0%	
Check: must total 100%	100.0%	If this is not 100% every revenue figure in the workbook is wrong.
Average monthly fee, founding rate	£138.00	The single most important derived number in the workbook.

FUNNEL

Booked calls per month, steady state	10	Target from docs/06, month 3 onward. The ramp itself is on the P&L sheet.
Calls held / calls booked	80.0%	No-shows. 80% is healthy.
Proposals sent / calls held	90.0%	Should be near 100% if you price on the call.
Proposals won	35.0%	docs/09 targets 30-40%. Below 25%, fix the diagnosis, not the price.
Monthly churn	2.0%	2% a month is about 22% a year. An assumption, not data.
Booked call to client conversion	25.2%	Ten booked calls a month becomes this many clients.

TRADING GATE — Klyara cannot sell before AML supervision lands

First month able to take a client	2	Month 2 = October 2026. Nothing is earned before this.

COSTS — monthly, excluding VAT

Software and tools stack	£200	Build Manual: about £180-£245 a month. Included on every client plan, in their name.
Scheduler	£24	Metricool Starter plus the X add-on.

Scheduler starts in month	2	
Google Ads	£300	£40 per booked call kill rule. Held at zero until supervision lands.
Google Ads starts in month	3	Month 3 = November 2026.
ICB licence and membership, a year	£406	£206 licence + £200 membership. Published fee.
Professional indemnity insurance, a year	£180	ESTIMATE - get a real quote and replace it.
Other and contingency	£100	Phone, accountancy, bank charges, the things nobody budgets for.
Fixed cost a month, once everything is on	£672.83	This is the number the break-even sheet divides.

PARTNERS AND REFERRALS

% of new clients introduced by a partner	25.0%	docs/23 target. Accountants, merchants, quantity surveyors.
Commission, % of their monthly fee	10.0%	Ongoing, for the life of the client. The cheapest client acquisition on the sheet.

CAPACITY AND THE HIRE

Clients one person can hold	25	Build Manual says 20-25. The top of the range is used here.
Hire trigger, clients	15	Start the recruitment conversation one month before this.
First employee salary	£30,000	ESTIMATE. Part-qualified bookkeeper, Surrey.
Employer National Insurance rate	15.0%	ESTIMATE - check the current rate before you rely on it.
Employer NI secondary threshold	£5,000	ESTIMATE - check the current threshold.
Employer pension contribution	3.0%	Auto-enrolment employer minimum. Verified: gov.uk workplace pensions.
Pension qualifying earnings, lower limit	£6,240	£6,240 to £50,270 band. Verified: gov.uk.
Fully loaded cost of one employee, a year	£34,462.80	
Fully loaded cost of one employee, a month	£2,871.90	Hiring moves break-even from five clients to twenty-six. That is why the trigger is fifteen.

THE FOUNDING RATE STEP-UP — target prices from September 2027

Solo, target	£89	Still under the £95-£200 standalone CIS return market.
Start, target	£149	Bottom of the £100-£250 sole-trader range.
Trade, target	£279	Under the £300-£500 contractor bundle.
Pro, target	£449	Under the £600-£1,500 multi-trade bundle.
Average monthly fee, target rate	£197.00	
Uplift on the average fee	42.8%	
Step-up starts in month	13	Month 13 = September 2027. The review date.
Months for the whole book to step up	12	Each client moves at their own twelve-month anniversary, so the book takes a year.

TAX AND VAT — Klyara's own, not the clients'

VAT registration threshold	£90,000	Rolling twelve-month turnover. Checked on the Cash flow sheet.
VAT rate	20.0%	
Month VAT registration takes effect	25	Month 25 = Sept 2028. The rolling turnover row on Cash flow shows why.
Share of costs carrying reclaimable input VAT	55.0%	ESTIMATE. Wages and the licence carry no input VAT.
Corporation tax rate	19.0%	Small profits rate. Marginal relief applies above £50,000 of profit.
Founder salary drawn, a month	-	Deliberately zero. Put a number in and every profit figure in the workbook moves.

Sources for every price comparator: docs/22, checked 26 August 2026.

Sources for every compliance figure: docs/17 section 8, checked against gov.uk on 26 August 2026.

Startup costs

One-off, before the first month of trading. Estimates are flagged in the cell comments.

ITEM	COST	VERIFIED?	NOTE
ICB practice licence, application	£94	Published	Published fee. Source: bookkeepers.org.uk, checked 26 August 2026.
ICB licence + membership, first year	£406	Published	£206 practice licence + £200 membership. Published fee, top of the £167-£200 membership range.
Professional indemnity insurance, first year	£180	ESTIMATE	ESTIMATE. Required by the ICB licence. Get a real quote - ICB members have a discounted route.
Companies House incorporation	£50	Published	Published fee for online incorporation. Source: gov.uk Companies House fees.
Software stack, first month up front	£200	From Assumptions	From the monthly cost on Assumptions. Paid before the first client.
Merchant cards, 250 A5 at 300dpi	£40	Quoted	docs/11 section 7. Trade print, 250 units.
tryklyara.com domain	£10	Published	The cold-outreach domain. Never use the main domain for cold email.
klyara.com renewal	£12	ESTIMATE	ESTIMATE. Registrar dependent.
Print pack - cards, folders, forms	£60	ESTIMATE	ESTIMATE. Business cards, a folder, the client-facing forms.
Photography	-	Deliberate	Deliberately zero. Do it on a phone.
Contingency	£250	ESTIMATE	ESTIMATE. Ten per cent and a bit, for the thing nobody thought of.
Total to get trading	**£1,302**		

How that compares

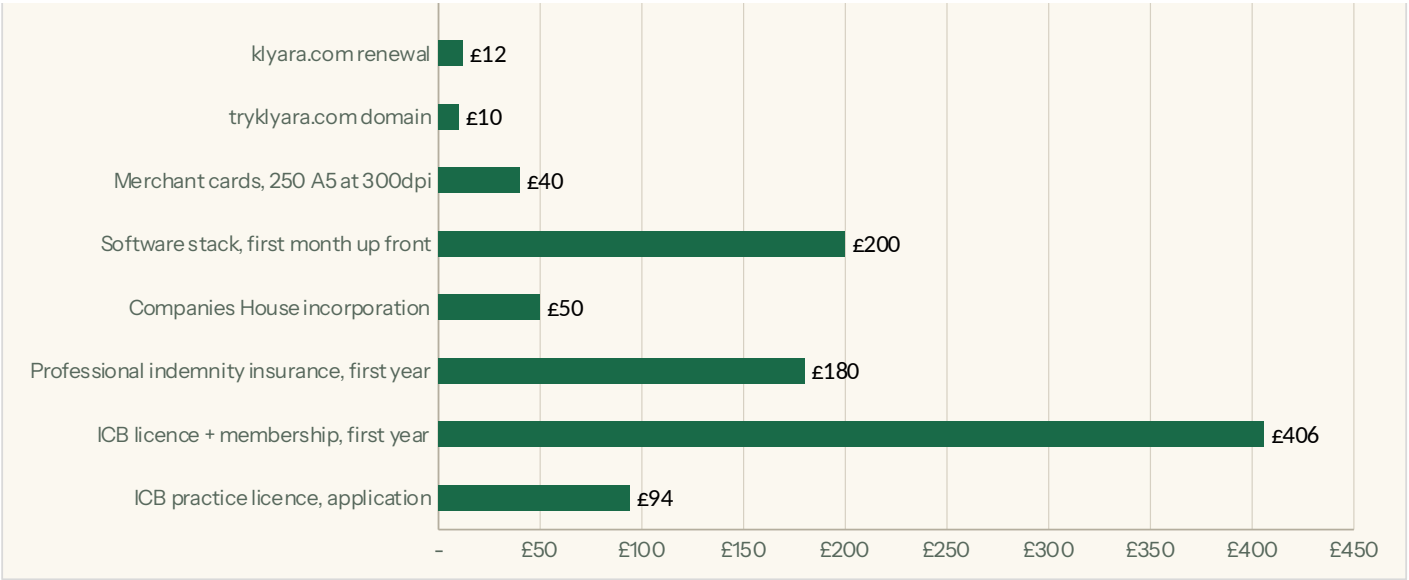

Fixed cost of one month of trading	£672.83
Months of fixed cost the startup spend represents	1.94
Clients needed in month one to have paid for it	9.43

The HMRC route to AML supervision was not taken and is not costed here. It is £300 to apply, £400 per premises a year and £40 per person for approval checks, and it takes up to 45 days. ICB is cheaper, faster and brings a professional body with it. Source: docs/17 section 1.

Not costed, deliberately: laptops, phones and a desk. The model assumes existing kit.

Also not costed: a founders' agreement. Budget a few hundred pounds and get it done anyway.

Klyara bills monthly in advance - invoice on the 25th, direct debit on the 1st - so the cash for a month is in the bank on the first working day of that month. A practice that billed in arrears would be waiting thirty days longer for every pound. That is the single biggest structural advantage in this cash flow and it is free.

VAT and corporation tax are shown as set aside from the moment they arise, not from the moment they

Break-even

How many clients cover the fixed costs. Three ways of asking the same question.

	NOW, ONE PERSON	AT THE 2027 PRICES	WITH ONE EMPLOYEE
Fixed costs a month	£672.83	£672.83	£3,544.73
Average monthly fee	£138.00	£197.00	£138.00
Less partner commission per client	(£3.45)	(£4.93)	(£3.45)
Contribution per client per month	£134.55	£192.08	£134.55
CLIENTS NEEDED TO BREAK EVEN	**5.00**	**3.50**	**26.35**
Rounded up	6	4	27
Revenue at break-even	£690	£690	£3,636

Software, scheduler, ads, licence, insurance and contingency. Plus one salary in the third column.

Commission is only paid on the partner-sourced share of the book.

Round up. You cannot have four fifths of a client.

What that means in practice

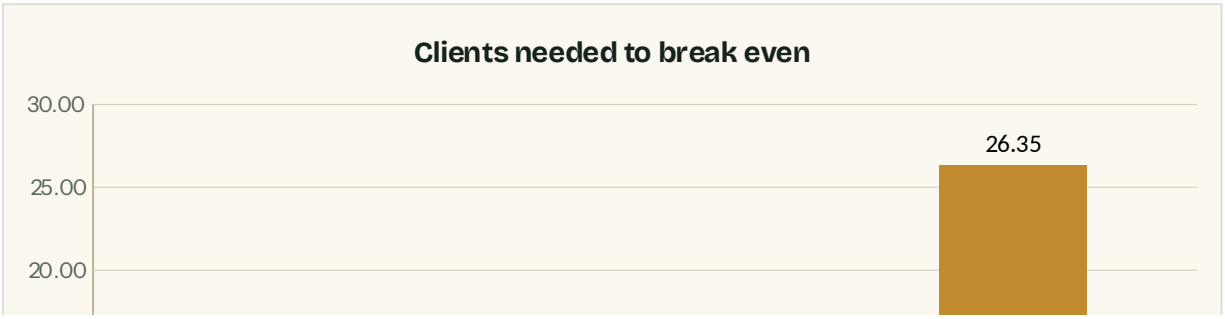

First month revenue exceeds costs	OCT 26
Clients at that point	1.26
Month the book reaches the break-even client cou	DEC 26
Every client past break-even is worth, per month	£134.55
And per year	£1,614.60

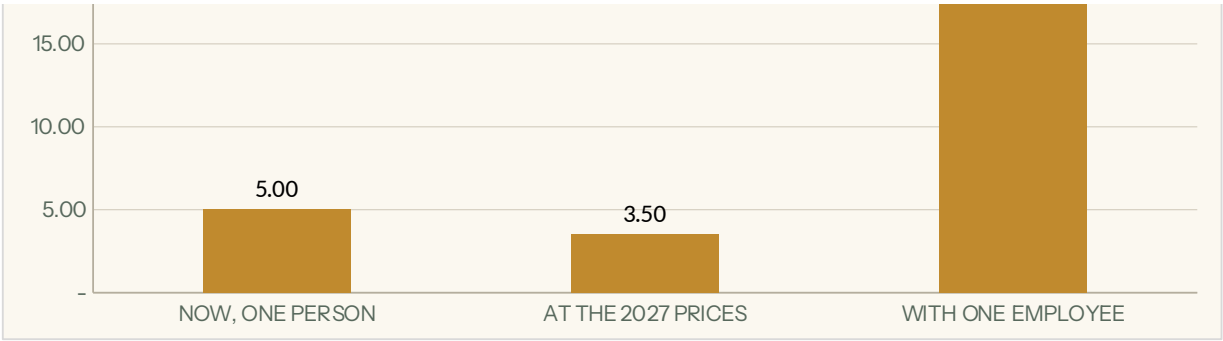

Fewer than five, because the ad budget has not started yet

On the full cost base, including the ad budget

The 2027 column is the whole argument for the founding-rate step-up. Same costs, same people, and the number of clients needed to keep the lights on drops by nearly a third - because the average fee goes from £138 to £197 without a single new client being won.

The third column is the whole argument for hiring early rather than late. One salary takes break-even from five clients to twenty-six, so the book has to be most of the way there already.

Pro	10.0%	£329	£32.90	23.8%
Total	**100.0%**		**£138.00**	**100.0%**

Proportion of the book on Tra	40.0%	docs/21 standard: 60% or better
Their share of the revenue	67.1%	

The hours are estimates. They are the only numbers on this sheet that are not published or derived, and they are the ones worth measuring first: keep a running note of time per client for one month

Dashboard

Six numbers. Nothing on this sheet is typed - it all comes from the sheets behind it.

THE NUMBER	VALUE	TARGET	WHAT IT TELLS YOU
MRR at month 12	£3,903	£4,000	Modelled, not forecast. Twenty-eight clients at £138.
Clients at month 12	28.28	25	Against a one-person ceiling of 25. Two people by then.
Clients needed to break even	5.00	5	Everything past the fifth client is profit.
Lowest point of cash	£3,349	-	If this goes negative you need more opening cash or fewer costs.
Month the hire trigger is passed	APR 27		Start the recruitment conversation a month before this.
Average fee, now and at the 2027 target	£138.00	£197.00	The founding-rate step-up is worth 42.8% on the fee.

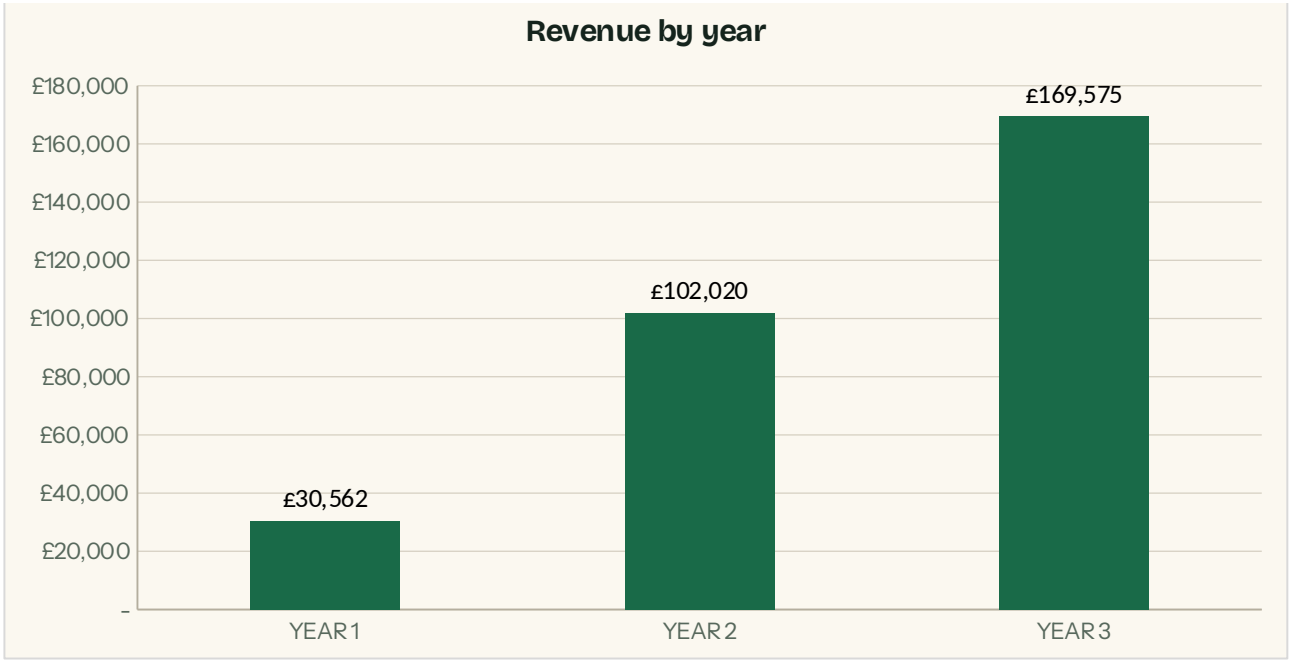

Year by year

	YEAR 1	YEAR 2	YEAR 3
Revenue	£30,562	£102,020	£169,575
Costs	£10,855	£44,852	£80,939
Profit before founder pay	£19,707	£57,168	£88,636
New clients won	30.80	31.32	39.95
Clients at year end	28.28	50.00	75.00
MRR at year end	£3,903	£9,850	£14,775

The health checks from docs/21

METRIC	MODEL SAYS	STANDARD	VERDICT
Average revenue per client	£138.00	£160	Below standard - weight the book to Trade
Effective hourly rate across the book	£48.63	£45	OK
Proportion of the book on Trade or Pro	40.0%	60.0%	Below standard - the upgrade triggers are the fix
Book still on a founding rate at month 24	0.0%	0.0%	OK

Every conversion rate behind these numbers is an assumption. Klyara has no trading history. Replace them with measured figures after six discovery calls and this sheet becomes useful rather than merely internally consistent.

You are looking at	**Plan**

Slow is a bad but survivable year: three quarters of the booked calls, a one in four win rate and churn at 3.5% a month. It is what happens if Google Business Profile verification drags and the accountant emails go nowhere.
