Klyara — The 90-Day Plan

One ordered list. Everything in the pack, sequenced, with owners and dependencies.

Thirteen documents is a lot to hold in your head. This is the running order.

Assume: launch Monday 14 September 2026, Guildford, AML supervision in progress. **Owner column:** K = Key, C = Craig, — = either.

PHASE 0 — This week, before launch

Everything here is blocking. Nothing in Phase 1 works properly until these are done.

#	DO	OWNER	DOC	WHY IT'S BLOCKING
0	**Apply for the ICB Practice Licence** — £94 application, then £373–£406 a year (£206 licence + £167–£200 membership), **includes AML supervision**, 28 days. Cheaper and faster than registering with HMRC direct (£300 + £400/premises, up to 45 days). See docs/17 §1.	C	17	28-day wait; everything revenue-generating sits behind it
1	**Pull the homepage testimonials.** Replace with the honest-new-firm block.	K	07	Legal and regulatory. Everything else is downstream of the site being defensible.
2	Audit every other site claim for present-tense truth. Future-tense what isn't live.	K	07	Same reason
3	Create social@klyara.com, into Bitwarden, 2FA	—	02	Every signup runs through it

	on			
4	Buy tryklyara.com	K	Build Manual §0.9	Cold outreach must never use the main domain
5	**Start Google Business Profile verification**	C	11	5–14 day wait. Longest lead time in the whole plan.
6	Paste the JSON-LD onto every page. Validate each in the Rich Results test.	K	08	Needs to be indexed before traffic arrives
7	Install Meta Pixel, LinkedIn Insight Tag, GA4, Search Console	K	06, 08	The audience you don't collect from day one is gone permanently
8	Publish the Guildford landing page	K	11, web/	The only page with buying intent behind it
9	Add newsletter capture after every calculator result	K	07	Highest-intent capture point on the site, currently doing nothing
10	Set up Brevo. SPF, DKIM, DMARC at p=none. Start the warm-up.	K	05	DNS propagation plus a 21-day ramp — start now or your first send lands in spam

Do 1, 3 and 5 today. The rest can spread across the week.

The decision gates

Don't carry on doing something that isn't working because it's in the plan.

WHEN	QUESTION	IF NO
End of week 2	Is GBP verified?	Chase it. Nothing local works until it is, and it is the single most common launch failure.
End of month 1	Four or more discovery calls from Guildford postcodes?	Almost always GBP verification. Check that before changing content.
£150 of ad spend	Cost per booked call under £40?	Pause ads. Organic, GBP and referrals cost nothing.
End of month 2	Any accountant partnership conversations live?	Send 20 more. This channel is the fastest route to clients 1–5 and 20 emails is a small sample.
End of month 3	8–12 booked calls a month?	Cut the bottom half of the channel map and put those hours into the top half.
End of month 3	Proposals converting above 25%?	Do not cut prices. Record three calls and listen to whether you're diagnosing or describing.
Any time	Are you doing more than 2 hours a week on social?	Either it's working and you hire, or you're overproducing for channels that aren't returning.

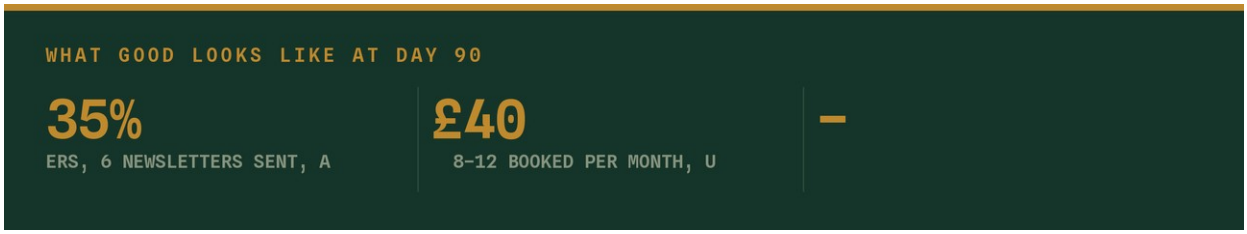

What good looks like at day 90

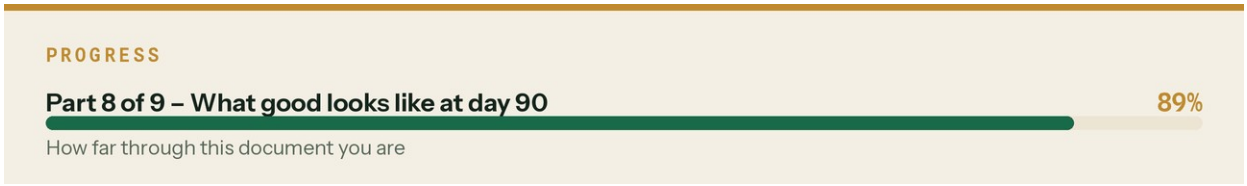

Google Business Profile	verified, 12 weekly posts, 5+ real reviews
Website	5 local pages indexed, schema on everything, capture on the calculators
Email list	150–400 subscribers, 6 newsletters sent, above 35% open
LinkedIn	12 anchor posts, Craig's profile doing the work
Reddit / forums	40+ genuine contributions, account healthy, first links earned
Partnerships	20+ accountants contacted, 2–4 conversations, 1 referral arrangement
Merchants	250 cards out, 2 counter managers who know your name
Clients	3–5 onboarded, each live within 5 working days
Calls	8–12 booked per month, under £40 each
Case studies	1 agreed, 2 more diarised

If the only thing you achieve is GBP verified, the Guildford page live with schema, twenty accountant emails sent and the weekly rhythm actually running — that is a successful 90 days. Everything else compounds off those four.

The line that matters

If the only thing you achieve is GBP verified, the Guildford page live with schema, twenty accountant emails sent and the weekly rhythm actually running — that is a successful 90 days.

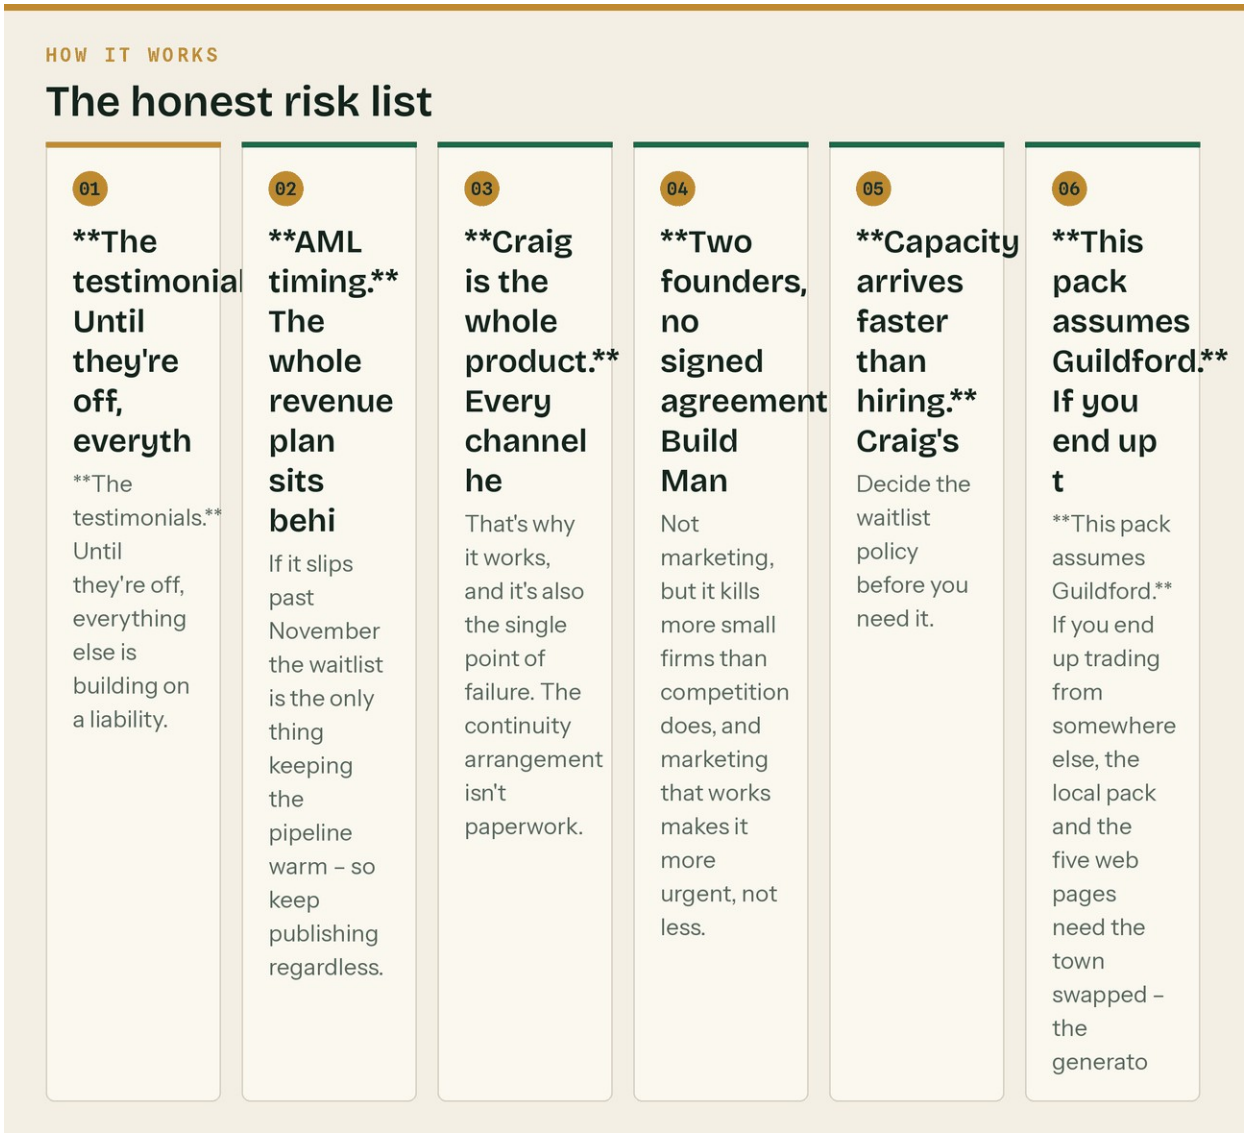

The honest risk list

Once, plainly, then it's your call.

1. **The testimonials.** Until they're off, everything else is building on a liability.
2. **AML timing.** The whole revenue plan sits behind it. If it slips past November the waitlist is the only thing keeping the pipeline warm — so keep publishing regardless.
3. **Craig is the whole product.** Every channel here is fronted by one person. That's why it works, and it's also the single point of failure. The continuity arrangement isn't paperwork.
4. **Two founders, no signed agreement.** Build Manual §0.3. Not marketing, but it kills more small firms than competition does, and marketing that works makes it more urgent, not less.
5. **Capacity arrives faster than hiring.** Craig's ceiling is 20–25 full-service equivalents and the hire trigger is 15. Decide the waitlist policy before you need it.
6. **This pack assumes Guildford.** If you end up trading from somewhere else, the local pack and the five web pages need the town swapped — the generator makes that a ten-minute job, but somebody has to remember to do it.

The same steps, in order.

Correction, 26 August 2026 — read this with the document above

- **FAQPage and HowTo schema no longer produce rich results.** FAQ rich results stopped appearing in

Google Search on 7 May 2026; HowTo was retired in September 2023. Keep the FAQ content and the markup, but move the effort to AccountingService, Organization, BreadcrumbList and Service. Full note in docs/08 §12.

- **Google Business Profile posts no longer expire.** Google stopped that in January 2021. Post weekly anyway — only the newest shows prominently and a stale profile reads as abandoned.

- **The verified figures live in docs/17 §8**, checked against gov.uk on 26 August 2026. Never publish a figure that is not in that table.

- **Current inventory:** 27 documents, 20 web pages, 180+ assets, 12 PDFs, 14 videos, one workbook.

Anywhere this document quotes a smaller count, it predates the later passes.

- **Twelve calculators vs four tools:** the twelve are the individual calculator pages already on klyara.com; the four are the consolidated web/tools.html. docs/08 §12 explains which schema goes where.
- **ICB cost:** £94 application, then £373–£406 a year (£206 licence plus £167–£200 membership). Anywhere this document says "£206 a year", it is quoting the licence only.

The line that matters

Keep the FAQ content and the markup, but move the effort to AccountingService, Organization, BreadcrumbList and Service.
