KLYARA

THE BACK OFFICE FOR BUILDING FIRMS

Business Plan

Guildford, Surrey · Launch Monday 14 September 2026

No clients yet. Not yet AML supervised. Every number here is a model, built on real published market prices and stated assumptions.

COMPARE

Start from the truth

A plan that pretends otherwise is worth nothing.

What Klyara has not got

- No clients. Not one.
- No AML supervision yet - the ICB application goes in on Tuesday 1 September 2026.
- No trading history, no reviews, no case studies.
- No revenue and no external funding.

What Klyara has got

- A published price list in a market where almost nobody publishes one.
- One industry only - construction, nothing else.
- A break-even of five clients and £1,302 of start-up cost.
- Ninety days of work already written out, day by day.

A plan that pretends otherwise is worth nothing, and in front of a licence application it is dangerous.

THE PROBLEM

A builder's admin is not hard. It is relentless.

A return every month, on the 19th

Whether or not anyone got paid. £100 the day it is late.

Paid 43 days after the invoice

Materials were paid for in week one.

Reverse charge VAT

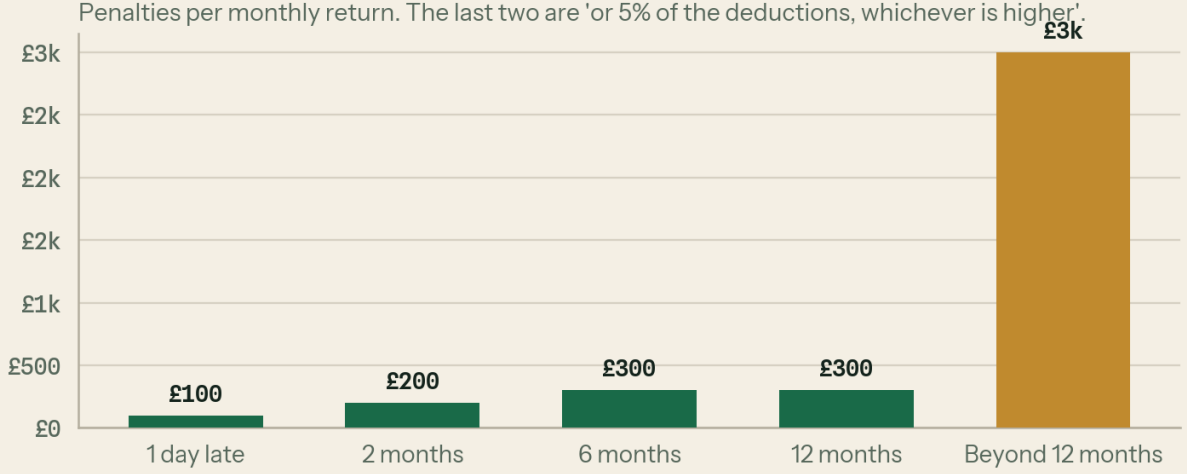

Most general bookkeepers get it wrong in at least one direction.

Making Tax Digital, April 2027

Another wave of sole traders into quarterly filing.

What a forgotten CIS return costs

Penalties per monthly return. The last two are 'or 5% of the deductions, whichever is higher'.

gov.uk - What you must do as a CIS contractor. Verified 26 August 2026.

HOW IT WORKS

From the national number to the one that matters

The last figure is the point. This is not a market share problem.

885,000

UK construction SMEs. 16% of every private sector business in the country.

252,000

Sole traders and one-person companies. The Solo and Start market.

~2,900

Construction businesses within a 20-mile radius of Guildford, on the national density.

25

Clients one person can hold. Klyara needs 0.9% of the local market, once.

Klyara does not need market share. It needs twenty-five clients. Sources: Dept for Business and Trade, ONS, BEIS.

COMPARE

The gap is not quality. It is that nobody will tell you the pric

Searched 26 August 2026 on 'CIS bookkeeping construction accountant Guildford Surrey monthly fee'.

What the other firms do

- Twelve of thirteen local firms publish no price at all.
- 'Get a quote'. 'Book a friendly meeting'. A form, then a wait.
- One local firm shows 'from as little as £35 a month' with no tiers and no mention of CIS.
- Construction is a division, not the whole firm.

What Klyara does

- Four prices on the page, in public, with what is in each.
- A named person and a Guildford number.
- Monthly CIS returns stated as included from £199, not billed at £15–£30 a time.
- Construction only. Nothing else.

Thirteen firms surface for the search. One publishes a full price list, and it is the London one.

THE LADDER

Four plans, one industry

Per month, excluding VAT. Monthly CIS returns are included from Trade upwards.

SOLO

£59

Sole-trader subbie. CIS suffered, not deducted.

Under 60 transactions

Self Assessment included

START

£99

VAT registered. Still working alone or with one hand.

60–149 transactions

VAT returns included

TRADE

£199

Pays subcontractors. The core client.

150–349 transactions

Monthly CIS returns included

PRO

£329

Established firm. Multiple jobs at once.

350–699 transactions

Job costing included

Source: docs/21 pricing, scope and quoting

Per month, excluding VAT. Monthly CIS returns are included from Trade upwards. Founding rate held for twelve months.

PRICE

Trade at £199 against the published market

COMPARISON

Trade at £199 against the published market

Every figure taken off a live page on 26 August 2026.

Every figure came off a live page on 26 August 2026. Sources: LOYALS, A One Outsourcing, Gro.

PRICING

The founding rate is the whole pricing strategy

Say it on day one

'Founding client rate, held for twelve months from the date you join.' It costs nothing now.

Show the £285 comparison

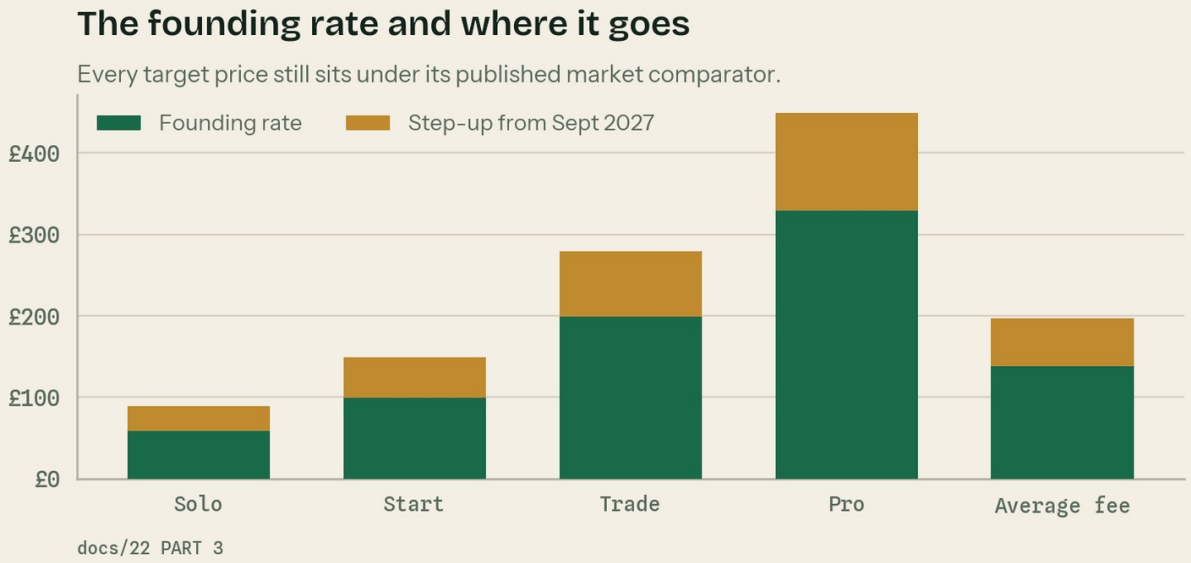

Bought separately at published rates, the work in Trade is about £285 a month.

Diarise 1 September 2027

Average fee moves from £138 to £197. That is £14,160 a year on twenty clients.

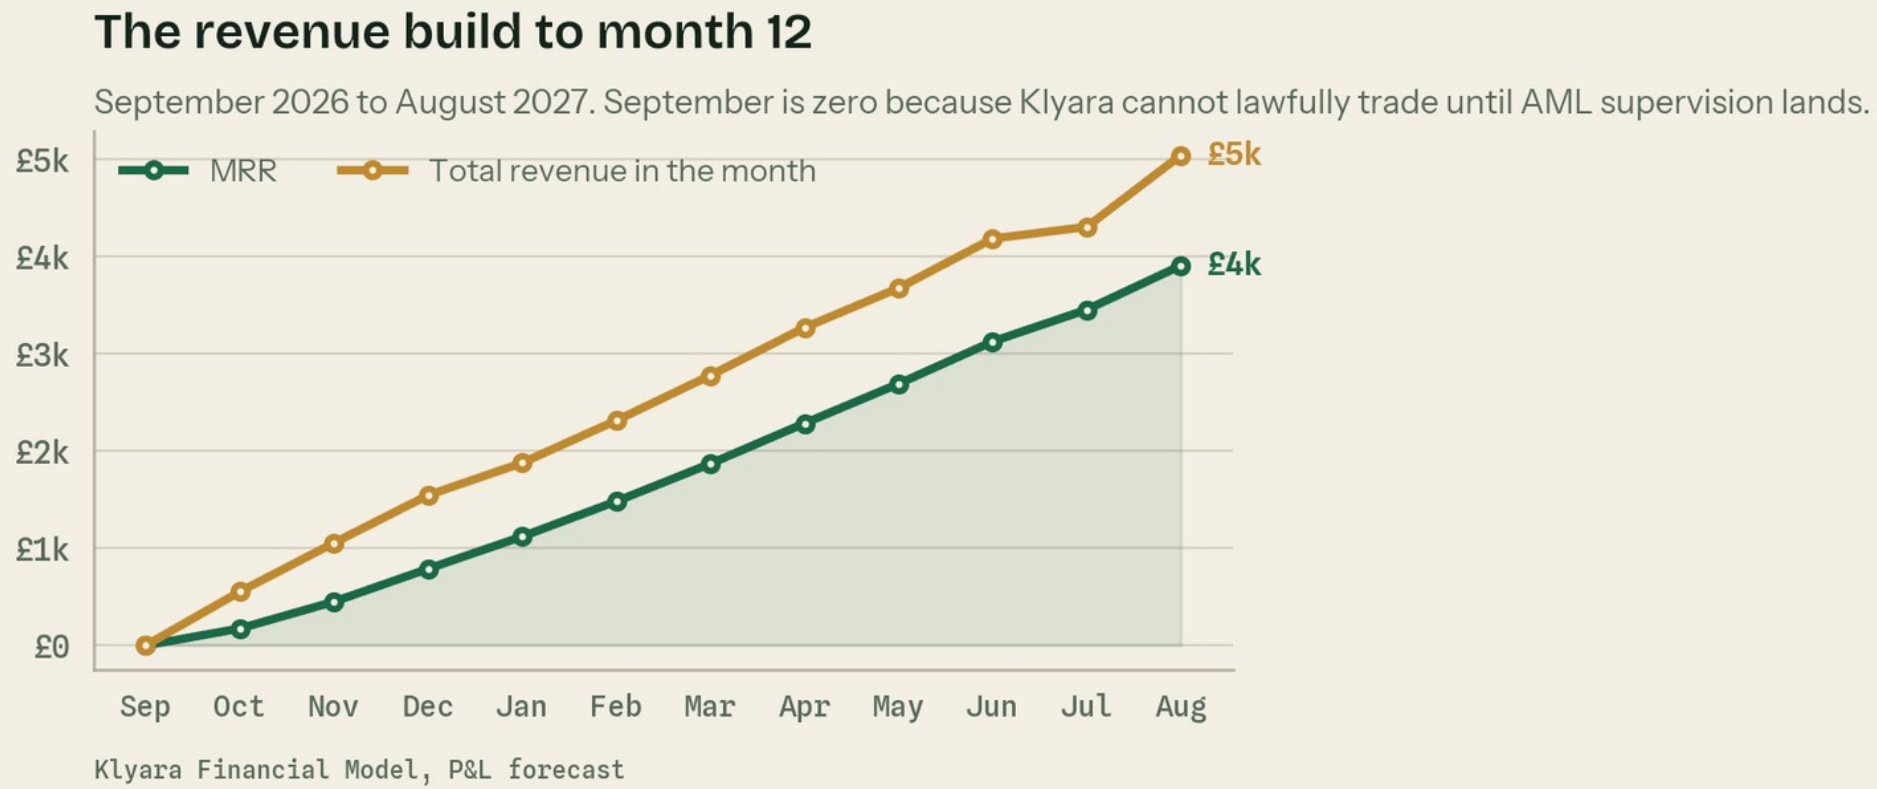

You can lose five of twenty

And still be ahead. The downside is bounded at two clients.

YEAR ONE

The revenue build to month twelve

September 2026 is deliberately zero. Klyara cannot lawfully trade until AML supervision lands.

THE NUMBERS

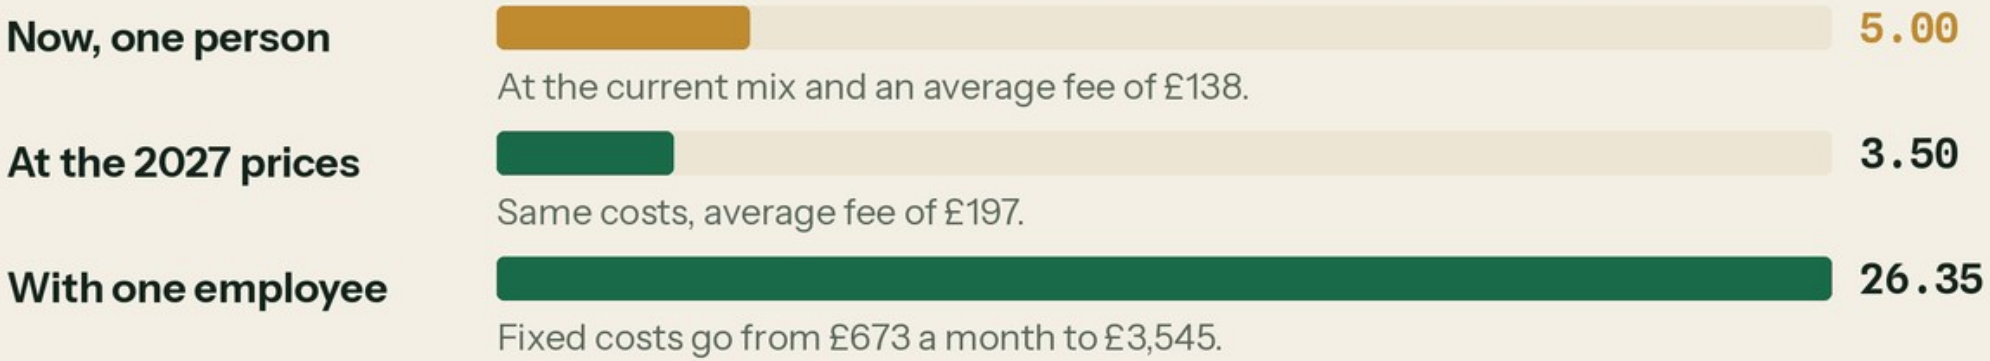

Five clients cover every fixed cost in the business

£1,302 to start trading. £673 a month of fixed cost. The book reaches five clients in December 2026.

COMPARISON

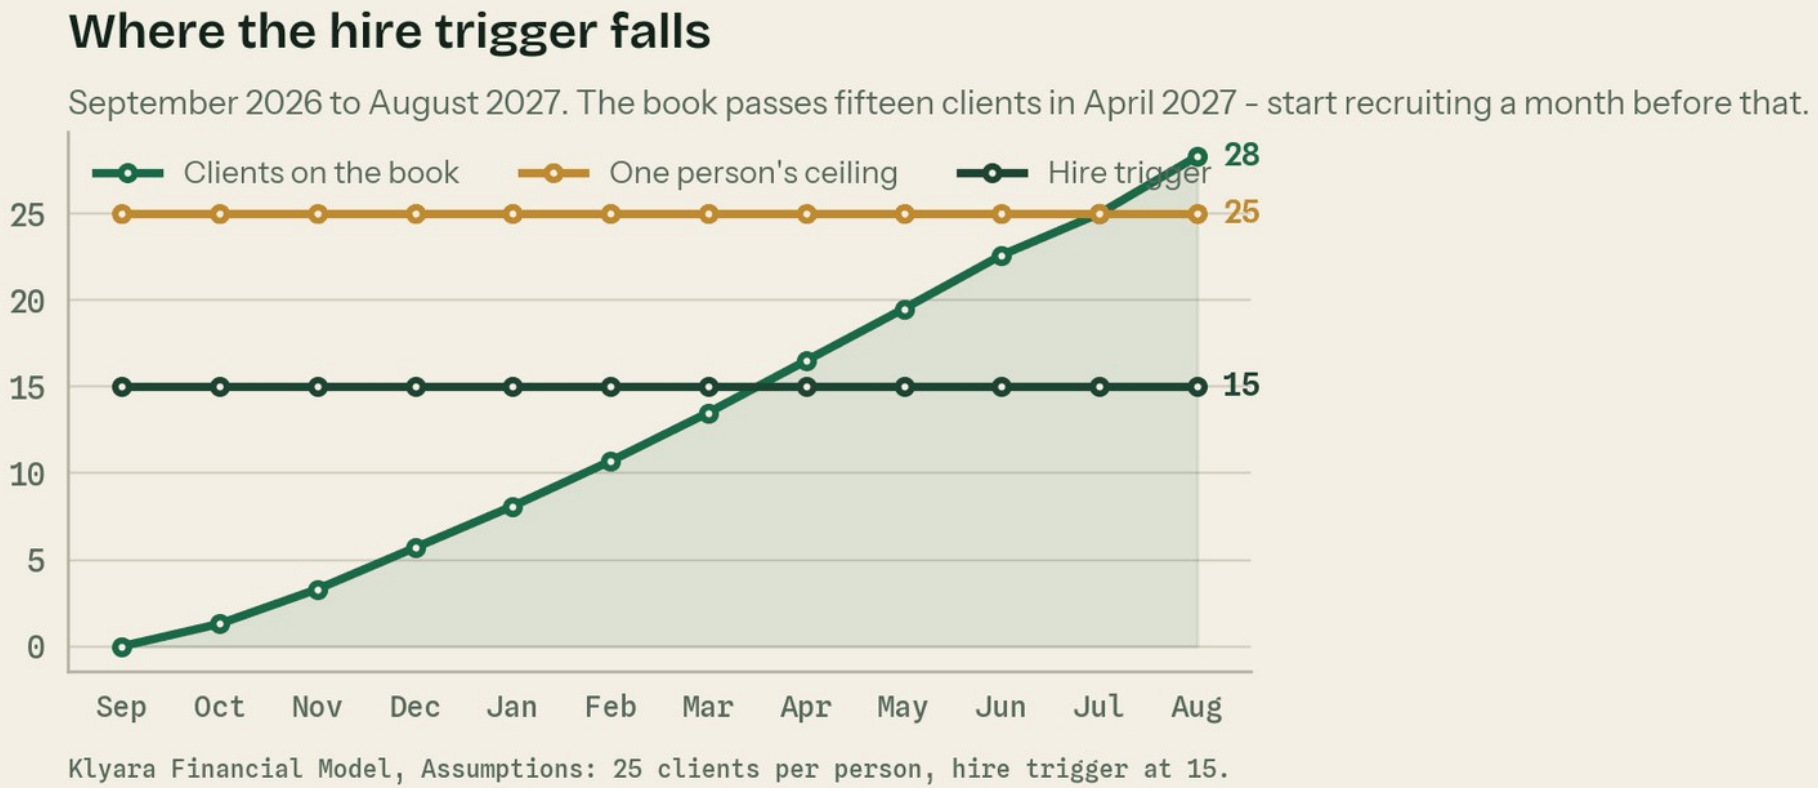

Clients needed to break even

Fixed costs divided by the average fee, after partner commission.

CAPACITY

Where the hire falls

Twenty-five clients is about 71 hours of delivery a month. The hire trigger is fifteen, and it is passed in April 2027.

HOW IT WORKS

What Klyara can and cannot do before supervision lands

This is not caution. It is the law, and the licence application is in front of a body with conduct rules on honest marketing.

01

Cannot do yet

Offer or sell bookkeeping. Take a client. Take a fee. Ask for a review. Any of it is carrying on business by way of business without supervision.

02

Can do now

Publish guides. Run the free calculators. Build the list. Hold a founding-rate waitlist. All of it is education, not offering.

03

The switch

The day supervision lands, every held CTA swaps to the live version. It is already written and waiting.

04

Then and only then

First client onboarded. First review asked for. Google Ads on.

ICB practice licence: £94 to apply, about 28 days, AML supervision included. The application goes in on Tuesday 1 September 2026.

TIMELINE

The ninety days, anchored

Day 1 is Monday 14 September 2026. Day 90 is Saturday 12 December 2026.

TUE 1 SEP — **Setup begins**

ICB practice licence application in. Google Business Profile verification started – it is the longest lead time in the plan.

MON 14 SEP — **Day 1. Launch.** YOU ARE HERE

The site goes live and thirty days of written content starts.

MON 21 SEP — **Week 2**

Twenty accountant partnership emails. The Slyfield merchant round. 250 cards out.

MON 19 OCT — **First CIS deadline**

Month to 5 October. Klyara files on the 12th, seven days early.

SAT 7 NOV — **MTD quarterly update**

Quarter to 5 October. The deadline is a Saturday, so the work is done by Friday 6 November.

SAT 12 DEC — **Day 90**

Full re-score against what actually happened, then the January run-up.

Nothing for Key or Craig is scheduled before Tuesday 1 September 2026. Every date is computed, not typed.

RISK

Four risks score fifteen or over. None are market risks.

Likelihood times impact. Fifteen and over needs a decision this month, not a note.

Three of the four are closed by paperwork this month. One is closed in ten minutes.

YEARS TWO AND THREE

Two things drive it, and neither is finding more customers

The founding-rate step-up

Average fee goes from £138 to £197 across the year from September 2027, without a single new client.

Capacity

The book hits the wall twice. Each time: hire, or hold a waitlist and let the price do the work.

Year 2 — £102,020

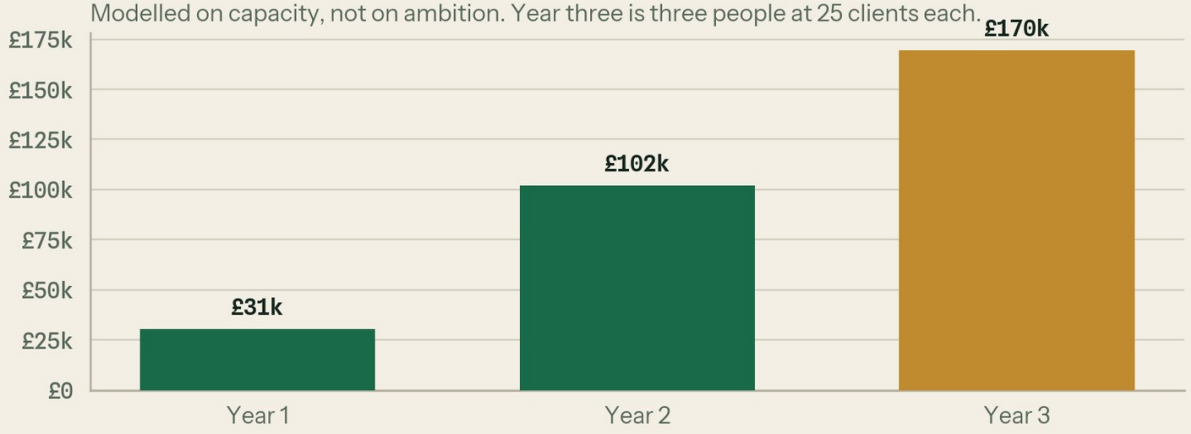

Two people, fifty clients.

Year 3 — £169,575

Three people, seventy-five clients. Then a decision about whether to keep going.

Three years of revenue

Modelled on capacity, not on ambition. Year three is three people at 25 clients each.

WHAT HAPPENS NEXT

Four things, and then it is a business

1

Pull the testimonials

Ten minutes. The highest-severity item on the register.

2

Get the licence in

Tuesday 1 September 2026. £94. About 28 days.

3

Sign the founders' agreement

Heads of terms this month. It does not need to be elaborate.

4

Send twenty emails

Week 2. Local accountants. The fastest route to clients one to five.
