CMYK above is a plain conversion for reference. Give the printer the hex and let the RIP convert. For a solid pine ground ask for a rich black build, not 79% K.

TYPE · THREE FACES, THREE JOBS

Run the jobs.

Bricolage Grotesque 800 / 600. Headlines, wordmark, numerals.

Everything you actually read.

Instrument Sans 400 / 500 / 650. Body, labels, lists. Line height 1.66.

MAKING TAX DIGITAL IS LIVE

Spline Sans Mono 500 / 600. Kickers, figures, footers. Always caps, .16em tracked.

STEP	ON SCREEN	IN PRINT

THE MARK · A ROUNDED SQUARE, NEVER A CIRCLE

on paper · on pine · app icon · clear space = half the tile

- Tile radius is 28% of the tile. The K is 56% of it, dead centre. Wordmark is Bricolage 800, gap 31% of the tile.
- Minimum size: 8 mm in print, 24 px on screen. Below that, use the K on its own.
- Never rebuild the K from a typed letter K. It is a polygon, not a glyph.

SPACING AND RULES

Corner radius	16 px small, 24 px large. In print 2.5 mm and 4 mm.
Hairline	1 px --line over paper. Two weights only, never three.
Accent rule	2.4 pt brass, 34 mm, left aligned under the heading.
Page margin	13-14 mm on A4. No text closer than 4 mm to the trim.
Measure	58 characters maximum on a line of body text.

THE FONTS ARE 108-GLYPH SUBSETS

Run every string through safe() in klyara_brand.py. A missing glyph prints as nothing at all, and nobody notices until it is on paper.

DO

- ✓ One ground per surface: paper or pine. Never both fighting.
- ✓ Brass once per page, on the one thing you want clicked.
- ✓ A mono kicker above every headline, uppercase and tracked.
- ✓ Headlines end with a full stop. They are sentences.
- ✓ Say the number. £199, not 'affordable'.

DO NOT

- ✗ Put the K in a circle. It is a rounded square everywhere.
- ✗ Set the wordmark in anything but Bricolage 800.
- ✗ Type an em dash, a tick or an arrow into Spline Mono.
- ✗ Tint or shade the brass. It is #C08A2E or it is not brass.
- ✗ Put emerald text on pine. Use bone; emerald on pine fails contrast.
