KLYARA

THE BACK OFFICE FOR BUILDERS

The Bolt-On Catalogue.

What each one does, why it saves you, what it costs.

Your bookkeeping plan keeps the tax side right. These bolt-ons run everything around it: the phone answered at midnight, the website that wins work, the reviews compounding underneath, the payroll rails, the back end watched. Every item stands alone, rolls monthly, and can be dropped with 30 days notice.

13 hrs
admin a week, typical DIY firm

1 in 3
calls missed while on the tools

62%
of callers ring the next firm

CHAPTER 01

Start here: how to choose.

Nobody needs all of this. Most firms need two things, and the two depend entirely on which problem is costing you most right now.

THE 30 SECOND VERSION

- Fix the leak before turning up the tap: answer the phone before you buy advertising.
- Free and cheap first: Google profile and reviews beat paid clicks for most local trades.
- Add one bolt-on at a time and give it a month before adding the next.
- Everything rolls monthly. If it does not earn its keep, drop it with 30 days notice.

The order we actually recommend

THE ORDER

1. **Answer every call**
   A missed call is a lost quote you already paid for. This is almost always the first fix, and the cheapest one available.
2. **Finish your Google profile**
   Free, an hour of work, and it decides whether you appear in the map pack where most local searches end.
3. **Collect reviews systematically**
   Ask every completed job. Volume and recency compound into rankings and trust at the same time.
4. **Get the website right**
   Fast, mobile-first, wired to your number. Now the traffic you are earning has somewhere to land.
5. **Then buy attention**
   Ads and social work once the first four are done. Before that, you are paying to send people to a leak.

THE HONEST ORDER

The sequencing advice is free and we give it to everyone, including people who never buy anything. A firm that adds all ten bolt-ons in one month cannot tell which one worked, and will cancel the wrong three.

WHAT A TYPICAL FIRM GETS BACK

Illustrative figures for a five-to-fifteen person firm running the full stack. Individual results vary with trade and patch.

CHAPTER 02

Front of house: never miss the job.

02

The calls and messages that become next month's work, captured whether you are on a roof, in a trench, or asleep.

AI receptionist

£79/mo

Answers in your firm's name, 24 hours a day

WHAT IT DOES

- Picks up every call instantly, including several at once on a rammed Monday morning.
- Takes the job details, books into your diary, and texts you the summary before the caller has hung up.
- Escalates anything it cannot handle, and never leaves someone listening to a voicemail beep.

WHY IT SAVES YOU

Most trades miss around a third of their calls and never know it happened. At a one-in-three quote-to-win rate and a typical job value, recovering six enquiries a month is the difference this pays for many times over.

24/7	0	~£6k
answered, always	calls to voicemail	monthly work recovered

Best for: Anyone on the tools during working hours, which is everyone.

Business number

£15/mo

A local number you own outright

WHAT IT DOES

- Rings every device you choose, in the order you choose, with holiday mode from the app.
- Voicemail arrives as a text you can read on scaffold without dialling in.
- Ports in and out freely: it is your number, not ours.

WHY IT SAVES YOU

Stops your personal mobile being the business line forever, and stops the number changing every time you switch provider. It also lets the receptionist and your handset share one front door.

Yours	Any device	Text
ported freely	rings in order	voicemail delivered

Best for: Firms still handing out a personal mobile.

Website chatbot

The night shift for your website

£29-£59/mo

WHAT IT DOES

- Answers visitor questions from a brief you approve, in your firm's words, not generic waffle.
- Qualifies the job (postcode, scope) and books the callback or the visit.
- One script tag on any website, including ones we did not build.

WHY IT SAVES YOU

Six in ten website enquiries arrive outside working hours. A form that sits unanswered until Monday loses to a competitor who replied at nine at night.

58%	Instant	1 tag
of enquiries after 5pm	reply, every time	to install

Best for: Anyone with a website getting traffic but few calls.

HOW THEY FIT TOGETHER

Everything here routes into one pipeline: calls, chats and forms land in the same portal record and the same morning summary. One firm, one memory, no cross-checking three apps to find out who rang.

CHAPTER 03

Money: paid right, paid faster.

The rails that pay your people correctly every Friday, and pull your own money in without an awkward text message.

Payroll with CIS

PAYE crew and CIS subbies in one run

£5-£8/payslip

WHAT IT DOES

- Weekly or monthly runs: payslips out, RTI filed on time, pension files submitted.
- Subbies verified, deducted correctly, and issued their statements within the deadline.
- You approve the summary from your phone; your own bank makes the payments; we never touch the money.

WHY IT SAVES YOU

Payroll is the one job that cannot slip, which is why it eats a Friday evening every single week when you do it yourself. Handing it over buys back roughly three hours a week and removes the automatic penalties entirely.

3 hrs	On time	£0
a week back	RTI, every run	held by us, ever

Best for: Any firm with PAYE staff, CIS subbies, or both.

Invoice chasing

Polite, relentless, automatic

£25/mo

WHAT IT DOES

- Escalating sequence from a day-one nudge to a day-30 letter citing statutory interest.
- Overdue is detected the day it happens, straight from the books we already keep.
- Retentions diarised at contract signature and chased on the release date.

WHY IT SAVES YOU

Firms with an automatic chase rhythm get paid roughly three weeks earlier than firms who chase when cash gets tight. Nobody enjoys the chasing call, which is exactly why it should not depend on your mood on a Friday.

25 days	Free	Day 1
earlier, typically	inside Trade and Pro	chasing starts

Best for: Anyone waiting more than 30 days to get paid.

MONEY IN, BEFORE AND AFTER

Typical improvement once terms are stated properly and chasing runs on rails rather than on memory.

CHAPTER 04

Get found: the shopfront.

Where local work actually comes from: a fast website, a finished Google profile, and reviews compounding underneath both.

Website build

Five pages, mobile-first, built to rank

£499 one-off

WHAT IT DOES

- Written for your trade in your town, not a template with your name dropped in.
- Wired to your number and your receptionist, so enquiries land in the same pipeline.
- You own the domain and the content, permanently, whatever happens between us.

WHY IT SAVES YOU

Nine in ten homeowners check you online before ringing. A dead site or no site sends that check to whoever ranks above you, and you never find out it happened.

5 pages	Mobile	Yours
that do the work	first, always	domain and content

Best for: Firms with no site, or a site that stopped in 2019.

Care plan

The web person who never vanishes

£29-£59/mo

WHAT IT DOES

- Hosting, SSL, daily off-site backups tested monthly, updates weekly, uptime watched around the clock.
- Small edits done within days, not whenever someone's cousin has a free evening.
- A monthly note of what the site actually brought in.

WHY IT SAVES YOU

An unwatched website averages several breakages a year: plugin rot, a lapsed certificate, a hacked page, an expired domain. Each one is invisible to you and obvious to a customer.

0	Daily	Days
incidents on watch	tested backups	not months, for edits

Best for: Any firm whose website matters to enquiries.

Google Ready

Your profile, finished properly, once

£249 one-off

WHAT IT DOES

- Claimed, verified, categorised precisely, photographed, services and areas completed in full.
- Name, address and phone made consistent across the directories Google cross-references.
- Handed over with a short list of the ten-minute weekly habits that keep it climbing.

WHY IT SAVES YOU

Most trade profiles are half filled in. Finishing yours outranks a large share of your local competition on its own, because they never went back to complete theirs.

Free	1 hour	Map pack
platform, forever	of real work	where clicks are

Best for: Every local trade business without exception.

Review collection

The ask that never gets forgotten

£39-£79/mo

WHAT IT DOES

- A well-timed request after every completed job, when satisfaction peaks.
- Owner replies drafted within a day, good and bad, because future customers read the replies.
- Monthly reputation report showing volume, rating and what people actually mention.

WHY IT SAVES YOU

Asking every customer instead of remembering to ask takes the same firm from a handful of reviews a year to over a hundred. Volume and recency both feed local rankings and both feed trust.

4 → 120	Never	<24h
reviews a year	gated or bought	replies drafted

Best for: Firms doing good work nobody can see evidence of.

	FREE	ONE-OFF	MONTHLY
Google profile finished	✓	✓	×
Website built	×	✓	×
Site kept alive and backed up	×	×	✓
Reviews arriving every week	×	×	✓
Rankings tracked and reported	×	×	✓

The cheapest items are at the top. Start there, and only pay monthly for the things that genuinely compound.

CHAPTER 05

Get found: fuel and proof.

The accelerants: paid clicks judged on booked calls, a feed that proves you are busy, and video that sells the next job before you quote it.

Local ads management

Judged on booked calls, not clicks

£149/mo flat

WHAT IT DOES

- Tight-radius search campaigns buying high-intent enquiries, with junk searches blocked from day one.
- Your budget is paid direct to Google: we never take a percentage of your spend.
- Reported monthly on cost per booked call, and killed fast if that number does not work.

WHY IT SAVES YOU

Unmanaged ad budgets lose roughly a third to irrelevant searches and another quarter to pages that bounce. Managing the same budget properly moves far more of it into actual enquiries.

£0	Cost/call	Radius
cut of your spend	the only metric	10–15 miles

Best for: Firms with the phone and website already sorted.

Social and content

Your job photos, doing work for you

£99–£179/mo

WHAT IT DOES

- Photos from your week become Google posts, Facebook and Instagram content, and a monthly article.
- Written in your voice, drafted for one-tap approval, scheduled so the calendar runs when your week explodes.
- Feeds the same search engine that ranks your profile: activity is a signal.

WHY IT SAVES YOU

A feed that stopped two years ago answers the wrong question about whether you are still trading. Consistency is worth more than brilliance here, and consistency is exactly what a busy trade cannot do alone.

Weekly	Your voice	Approve
without your evenings	not corporate waffle	in one tap

Best for: Firms whose last post was a long time ago.

Video showcases

Thirty seconds that sells the next job

£149-£399 each

WHAT IT DOES

- Phone footage cut into 30 to 60 second showcases with captions and licensed music.
- Sized for every platform plus the website, so one shoot feeds everything.
- The before-and-after reel: the most persuasive asset in domestic construction.

WHY IT SAVES YOU

Video reaches several times further than a photo on the same feed, to the same local audience, and it answers the quality question a homeowner cannot ask out loud.

7x	Your phone	One shoot
reach vs text posts	is the camera	many platforms

Best for: Firms doing visible, photogenic work.

CHAPTER 06

The back end: the boring bits, watched.

Nobody thanks the back end until it fails. Ours is watched daily so the correct amount of your time spent on it is zero.

Professional email

you@yourfirm.co.uk

£3-£5/mailbox/mo

WHAT IT DOES

- History migrated, phones set up, shared inboxes for info@ and accounts@ where sensible.
- Proper deliverability records so your quotes stop landing in junk folders.
- Backed up and supported by the same people who answer your other calls.

WHY IT SAVES YOU

A three pound upgrade that quietly dresses every estimate you send. Commercial clients notice a gmail address more than anyone admits out loud.

£3	Migrated	Inbox
per mailbox	nothing lost	not junk

Best for: Any firm still quoting from a personal email address.

Domains

Registered in your name, watched

£15-£20/yr

WHAT IT DOES

- Registered or rescued into your ownership, auto-renewed, and monitored.
- Hostage-domain recovery from vanished web designers is a genuine weekly service here.
- Renewal dates diarised so nothing lapses while you are on site.

WHY IT SAVES YOU

A lapsed domain takes your website and your email down together, usually on a Friday. Recovery is possible and expensive; prevention is fifteen pounds a year.

Yours	Auto	Rescue
in your name	renewed and watched	from old developers

Best for: Anyone whose domain is registered to someone else.

Hosting with care

Fast UK hosting, watched daily

£10-£20/mo

WHAT IT DOES

- SSL, daily off-site backups tested monthly, weekly updates, uptime pinged around the clock.
- Included inside website care plans, standalone for sites we did not build.
- One panel, one bill, one number to ring when something looks wrong.

WHY IT SAVES YOU

Slow hosting costs you visitors before the first photo loads, and Google demotes it besides. If your current site takes more than three seconds on a phone, that alone justifies the move.

<3s	Daily	24/7
load target	backups, tested	uptime watched

Best for: Firms whose site is slow, or hosted somewhere nobody can name.

CHAPTER 07

On us: the free introductions.

Four things we introduce and never charge you for, because the partner pays us. You keep the choice, and we never advise.

Introductions

Insurance, energy, finance, formation

Free

WHAT IT DOES

- Insurance: brokers who write contractors-all-risk and ten-man CIS firms every week.
- Business finance: construction-specific invoice and contract finance, for the cash-flow gaps we can see coming.
- Energy and company formation: sorted in one call rather than three evenings of comparison sites.

WHY IT SAVES YOU

These take hours off your admin and cost you nothing extra: the partner pays the introduction fee, not you. We pass your details and step back, because introducing is not advising and we keep that line bright.

£0	Hours	Your call
to you, always	of shopping saved	we never advise

Best for: Everyone. There is no reason not to use these.

WHERE THE LINE SITS

We are introducers, not advisers or brokers. We pass your name and contact details to a specialist who is regulated to do the job properly, and the decision is entirely yours. If a partner ever performs badly, tell us and they come off the list.

CHAPTER 08

Bundles and the whole price list.

The combinations firms actually buy, then every price on one page so you can plan without ringing anyone.

The Front Desk

£99/mo
separately £94/mo

- Business number, yours and portable
- AI receptionist answering 24/7
- Everything routed into one morning summary

The most-chosen combination on the sheet. Smart routing means the number and the answering behave as one system.

The Shopfront

£549 one-off, then £59/mo
separately £748 + £59/mo

- Five-page website built and wired to your number
- Google Ready profile finished properly
- Care plan: hosting, backups, edits, monitoring

Everything a firm needs to be found and to look credible, set up once and then kept alive.

The Full Back Office

from £329/mo
separately priced per firm

- Klyara Pro bookkeeping, VAT, CIS and payroll
- Front Desk: number and 24/7 answering
- Website, care plan and local search retainer
- Invoice chasing and review collection included

For firms that want one supplier, one bill and one number to ring. Quoted exactly after a call, never sold blind.

Every price, one page

BOLT-ON	FROM	BILLED
AI receptionist	£79	monthly
Business number	£15	monthly
Number + receptionist	£99	monthly
Website chatbot	£29	monthly
Payroll with CIS	£5	per payslip

Invoice chasing	£25	monthly, free on Trade+
Website build	£499	one-off
Care plan	£29	monthly
Google Ready	£249	one-off
Local search retainer	£149	monthly
Review collection	£39	monthly
Local ads management	£149	monthly, flat
Social and content	£99	monthly
Video showcases	£149	per video
Professional email	£3	per mailbox
Domains	£15	yearly
Hosting with care	£10	monthly
Introductions	Free	never charged

THE TERMS, PLAINLY

All prices ex VAT and quoted in writing before anything starts. Monthly items roll with 30 days notice and no exit fee. One-off items are fixed price, not estimates that grow. If we think a bolt-on will not pay for itself on your patch, we will say so.

CHAPTER 09

How to start.

No forms, no discovery workshop, no three-week proposal. One call, an honest recommendation, and usually two bolt-ons rather than ten.

THE ORDER

1. **Book a 20-minute call**
   At klyara.com/contact, or ring 020 8058 1496. Bring one problem, not a shopping list.
2. **We tell you what to fix first**
   Usually the phone, usually free-to-cheap things before paid ones. Sometimes the answer is 'nothing yet'.
3. **You get it in writing**
   Exact prices, what is included, what is not, and what happens if you want to stop.
4. **It goes live in days**
   Most bolt-ons are running within a week. Websites take longer and are scheduled properly.
5. **Judge it after a month**
   One bolt-on at a time, given a month, so you can actually tell what worked.

> **If a bolt-on is not paying for itself, we would rather you dropped it than resented it. The bookkeeping is the relationship; these are tools.**
>
> HOW WE THINK ABOUT THE CATALOGUE

Klyara is a back office built only for construction: books, CIS, MTD, payroll, phones answered and work won. AI does the grunt work, a named construction specialist checks everything HMRC ever sees, and we never touch your money. Every price in this catalogue is ex VAT, current at 2026, and published in the open at klyara.com.

© Klyara 2026 · general guidance, not advice · prices current at publication, confirmed in writing before anything starts.
