CIS monthly checklist.

The contractor month in order. Same rhythm every month, no drama, no automatic penalties.

- [ ] **Before paying anyone new**
  Verify the subcontractor with HMRC first. The verification sets the rate: 20 percent, 30 percent or gross.
- [ ] **Check the invoice split**
  Materials listed separately, at cost, with evidence. Deductions come off labour only.
- [ ] **Deduct at the verified rate**
  Apply it to the labour element, and keep the calculation filed with the invoice.
- [ ] **File the return by the 19th**
  Every month without exception. Penalties start at £100 per late return and climb from there.
- [ ] **Pay HMRC what you held**
  Deductions go to HMRC by the 22nd if paying electronically. Diarise it alongside the return.
- [ ] **Issue deduction statements**
  Every deducted subbie gets a written statement each month. It is their refund evidence.
- [ ] **File the nil months too**
  No payments this month still means a return, until HMRC agrees the scheme is dormant.
- [ ] **Keep the records**
  Statements, verifications and calculations. HMRC can ask about them years later.

Or hand the rhythm to Klyara: verification, deductions, returns and statements, done.
